

GaiaNordic

The Earth is alive and
WE are her voice

GaiaNordic is an existential political project, based on a spiritual cosmology, holistic psychology and an ecological economy.

GaiaNordic recognizes the Earth as a living being (Gaia) and considers the inner transition and the healing of our collective trauma as a requirement for a peaceful global transition.

GaiaNordic's goal is to create a Nordic pioneer region by doing away with artificial dichotomies, false premises and obsolete narratives that spawns unnecessary conflicts and derails meaningful dialogue.

Basic principles

The **Gaian world view** is founded in modern physics realizing that all is connected in spirit. Gaia's political practice has three main pillars:

- **Spiritual Cosmology:** The direct experience of the transpersonal changes you for ever. In GaiaNordic, spiritual curiosity and a willingness to open ourselves to the intent of the soul is therefore part of our practice.
- **Holistic psychology:** We cannot change the world until we have changed ourselves. We must heal our own wounds to enable us to look upon our opponents with soft eyes and create a world with room for everyone.
- **Ecological economy.** There exists only two kinds of economy: The real economy that works on ecological principles and a fictitious economy. The fictitious economy is used by the 1% to steal the values of society. To finance the changes needed, this must be stopped.

Danish key issues

Denmark holds a unique position between East and West while simultaneously connecting Scandinavia and Europe. Historically Denmark has been a pioneer for cultural innovation. GaiaNordic wants Denmark to boldly show the way into a sustainable future. Amongst our goals are:

- **Ecological economy:** Denmark should be 100% sustainable and a localization policy implemented that supports economic resilience.
- **Digital freedom and security:** New legislation is required to provide citizens with genuine data security. Electronic pollution should be limited.
- **Holistic health service:** Evidence-based alternative medicine should be available on par with traditional medicine in a new health care paradigm.
- **Liberating spiritual traditions.** Church and state must be separated and obsolete and oppressive thought forms transformed or eliminated.
- **Renewal of the welfare system.** Based on a holistic world view, and trust in the citizens, a major reform of the social system is in order.

International key issues

GaiaNordic is rooted in a global consciousness perspective. However, it is limited what Denmark can achieve alone. On the global scene the goal is:

- **Gaia should be awarded legal rights.** Gaia is a living being and should possess rights that protect her from arbitrary abuse.
- **Nordic pioneer region.** Scandinavia should be united in a region based on freedom and community that can show the way towards a global future.
- **A new UN:** The UN must be reformed or replaced and member states who violate the common charter must lose their right to vote.
- **Economics:** The global economic system must be reformed from the bottom up based on ecological principles. All fortunes above \$1 bio. is taxed with a 10% annual tax until the global equality is acceptable. The tax can finance the global transition.
- **Global Truth and Reconciliation Committee.** Using Nelson Mandela and Desmond Tutu as inspiration we must do away with all the lies and abuse that undermine freedom and sustainability and heal the collective wounds.

Organisation

Central to the GaiaNordic dna is the confrontation with "The Shadows of Power" – the ways in which our subconscious mind distorts our perception of reality. To handle this GaiaNordic will apply some organizational innovations:

- **Healing and reconciliation as organizational practice.** Based on insights from holistic psychology an organizational practice must be developed that can overcome the "Shadows of Power".
- **Council of Wisdom will illuminate organizational shadows.** A council of wise elders will be chosen to act as ombudsraad and create consistency between visions and reality.
- **Sociocracy and holocracy.** GaiaNordic will experiment with the best decision making models to create a combination of flexibility, dynamism and integrity in the organization.

GAIANORDIC

The Earth is alive and we are her voice

Perspectives

GaiaNordic is neither right wing nor left wing. It is a project based on a sense of wholeness. It is founded in a spirit of solidarity and community that the left has historically fought for. At the same time it is founded on the principles of individual freedom and sovereignty that the right has historically fought for.

GaiaNordic is neither one nor the other but a vision of creating a *synthesis* between the two points of view that, both locally and globally can create a balance between freedom, equality and justice.

Cosmology and Symbolism

Gaia is, according to Greek mythology, the goddess of the Earth or the Earth itself. She can be considered the mother of all life and a symbol of the living Earth. The flower in the GaiaNordic logo comes from "the flower of life" and the six petals represents the various conflicting sides in the human nature that must be integrated to become a whole person.

GaiaNordic rejects the age old patriarchal traditions, institutions and ways of thinking in an attempt to heal the wounds these institutions have inflicted upon the feminine on all levels (men, women and the Earth's living systems). The goal is to create a correct relation between humanity, as the planet's creative center, and the Earth (Gaia) as the foundation of all life.
