

GaiaVille

Source of beauty

Gaiville is a community, where our sense of beauty and the mystery of life is expressed in creative architecture and an inspired lifestyle.

Gaiville is founded on the notion that the Earth is a living being (Gaia) who expresses her love, light and creative power through us.

Gaiville is a vision of a life of creative joy where art and healing transforms life's difficult experiences into wisdom, love and meaningful action.

GAIAVILLE

The Dance of the Masculine and Feminine

Gaiaville is a part of a project containing three creative centres:

- **House of Beowulf:** a business center where spiritual entrepreneurs can develop their visions, create new businesses and achieve financial success.
- **Gaiaville:** a community with 25 houses and a common house with beautiful gardens, partial self-sufficiency and an ecological lifestyle.
- **Oberion – School of Creative Synthesis:** a center of spiritual growth, healing and spiritual research.

These three creative centres anchor, respectively, the energies of the masculine (the Father), the feminine (the Mother) and creativity (the Child).

Gaiaville is conceived of as a community where the feminine sense of beauty and high vibrations is the center of a creative and ensouled lifestyle.

An Honest and Creative Community

Gaiaville is considered a microcosm, where the big challenges in the world around us is mirrored into a creative space that has a human scale – which empowers meaningful action. We neither shy away from the big spiritual challenges, nor do we hide our light under a bushel. In practice this means:

- **Meditation, healing & lightwork** is an essential part of life in Gaiaville.
- **Truth, love and freedom** is at the foundation of how we deal with life and each other.
- **Purity in food, air, water and vibrations are a high priority** and electrosmog and similar sources of pollution is minimized.
- **Men and women are created to give each other joy.** In this spirit we seek to heal each other's wounds and nurture love and joy in everyday life.
- **Money is creative power.** We relate honestly to money and their significance for each of us and the world around us. We work to gain recognition from the world around of the spiritual reality we live in.

GAIAVILLE

The Philosophical Foundation

The philosophical underpinnings of Gaiaville is an enlightened scientific attitude based on the notion that everything is connected in spirit. It is our understanding that the Earth has gone through a dark journey for thousands of years and is currently undergoing a cosmic awakening.

The spiritual understanding behind the project is that:

- **The Earth is a love planet.** For this reason the emotional life in Earth is very intense and challenging and our desires often overwhelming.
- **A cosmic shadow currently seeks to possess our minds.** When this evil influence is overcome, the cosmic light generated from this process will create a positive influence that will extend far into the universe.
- **Communities such as Gaiaville are important pieces in the healing of the Earth** because they facilitate awareness of our own shadows and provide training grounds for co-creating in a spirit of love.

Money and Finance

Money is a touchy subject to many because they are abused to manipulate and enslave people. But money is also creative power and if we wish to heal the Earth we must also heal our relations to money. In Gaiaville we deal honestly with money and the challenges they present. This means:

- **Houses and building lots can be found in all sizes and price classes,** offering something to all lifestyles and wallets.
- **We seek to work realistically with money and investment,** amongst others to heal the dichotomy that exist between labor and capital in the world.
- **The price of houses are market level,** but you will get more value and beauty for the money. There are options to buy, rent or a combo model.
- **Individuals receiving public benefits work part time for the community** to re-circulate the support they receive from the big community (society).
- **The community strives to create jobs,** financial surplus and creative businesses to make the community economy healthy and resilient.

GAIAVILLE

Everyday Life in Gaiaville

We like everyday life. However, exactly what it will look like depends on you. Some of the elements we imagine are:

- **It should be beautiful.** We plan an artificial lake, beautiful gardens, there is a stone circle and power places and we plan to create lots of art together.
- **It should be fun.** The lovely common house has space for music and play.
- **It should be easy.** Those who want to, can eat together during week days, so they only have to cook once in a rare while.
- **It should be meaningful.** We plan our own TV station with debate programs that aim to impact society with visionary ideas.
- **It is for both children, adults and families.** There will be soccer fields, ritual spaces, fireplaces, children's playgrounds, vegetable gardens and more.

Where do I begin...

If you are interested in our work, then join our Facebook group or send us an email. The project is going through a planning phase in 2022 and hopefully we are ready to start building in 2023/24. If you have money and would like to invest in a solid project with good returns let us know. Early investors can come in line for the best building sites.

Gaiaville is in Odense: Åsum Bygade 18, 5240 Odense NØ, +45 20323120
